

Kalmar DCG90-180

Lift trucks 9 – 18 tonnes

Designed to deliver greater total lifetime savings

The DCG90-180 is a range of new Kalmar trucks with a lifting capacity of 9 – 18 tonnes. The new DCG90-180 is the result of our customer-focused product development activities as well as our deep commitment to improving the performance of lift trucks. In fact, DCG90-180 capitalizes on insights we have gained from the more than 10.000 worldwide users of Kalmar trucks with this lifting capacity.

Introducing Kalmar DCG90-180

The new Kalmar DCG90-180 is designed, built and delivered to offer greater total lifetime savings. This new range of Kalmar trucks offer these savings by improving the performance of your truck-and-driver teams. Below is a summary of how the Kalmar DCG90-180 benefits your business.

Give your savings a lift

The following pages provide you more details about the Kalmar DCG90-180. Contact your local Cargotec representative for a closer look and a test drive.

Model designation

Dimensions

		DCG90-6	DCG100-6	DCG120-6	DCG127-6

New EGO cabin: our most productive driving environment. Ever.

Improving a driver's working environment – the cabin – stimulates productivity, efficiency and safety. That's why the new DCG90-180 incorporates our most productive driving environment: the new EGO cabin. It's loaded with outstanding ergonomics and smart features that help drivers optimally perform their work. As important, the truck has new electric and hydraulic systems as well as modern lifting equipment to help drivers boost productivity and operational savings.

EGO cabin enables driver productivity

The new EGO cabin is a spacious workplace. Its curved glass window gives the operator excellent side-to-side and overhead visibility. Below is a closer look at some of the interior of DCG90-180.

Ergonomic steering wheel

It's adjustable and can also be tilted to the side. This decreases stress on the operator during driving and reversing.

Comfort pedals

A new flexible and safe pedal system with an adjustable pedal angle. Improves ergonomics and minimizes strain on the driver's foot. A floor-based solution gives a hanging pedal feel.

Windshield wipers

Provides over 90% coverage of the curved front window. Roof wipers are also integrated. It all means superior visibility and safety.

Ergonomic multi-seat

Rotatable and fully integrated. Built for maximum sitting posture, comfort and ergonomics during long shifts and demanding operations.

Climate package

Complete and flexible climate control system that matches the high demands of the climate tested EGO cabin. Large air intakes. Easy filter replacement in the front. Complete driving comfort from well-dimensioned and -designed components.

Work console

Easy to set, adjust, use and understand. All necessary controls, switches, levers and indicators easily accessible for effective operations. Clear and well-placed panels and steering wheel controls for data display.

Operating console

The complete unit for operators who use the mini-wheel or steering lever. Integrated gear knobs. Fully adjustable and individually tested for optimal ergonomics. The ergonomic steering wheel is folded forward without limiting vision.

Optimized visibility

Completely new open design. Designed with smart profiles and curved front and rear windows. An optimized view at all angles, with an exceptionally good view diagonally forwards and backwards. Strong outdoors feeling.

Lifting equipment

Here is how the DCG90-180 helps drivers optimize lifting efficiency and save fuel – at the same time. To begin with, its new electric and hydraulic systems mean quicker response, high lifting speed and increased control. Meanwhile, new load sensing hydraulic pumps improve fuel efficiency. Operating together, this combination improves productivity and saves fuel – every lift.

As lifting equipment plays a vital role in the performance of any forklift, it is important yours match your individual requirements and applications. For instance, careful consideration should be made to factors such as lift height, clearance, free lift, carriage flexibility, etc. in order to optimize operations.

Cargotec offer you a complete range of standard and custom lifting equipment – carriage, fork shaft, forks, levelling, etc – and options to suit your specific lifting and cargo handling requirements.

Drive train

Engine range

You can equip the drive train of the new Kalmar DCG90-180 with one of two different diesel engines: from Volvo or Cummins. Both are powerful, durable, reduce fuel consumption and compliant with EU Stage IIIB / EPA Tier 4i emissions.

Equipped with your choice of EU Stage IIIB / EPA Tier 4i compliant diesel engine from Volvo or Cummins, your DCG90-180 engine offers many improvements. Both cut particulate emissions by 90% and reduce nitrogen oxide emissions

by half. As important, both ensure maximum power and torque are available at low rpm as well as improve fuel efficiency without compromising operational reliability, durability or performance. The trucks are fitted with an efficient and easy-to-service split cooling system.

Transmission

The electronically controlled gearbox allows comfortable, efficient and safe driving at all speeds and operating lifting equipment with high precision. We offer a wide range of gearboxes to match your needs and preferences.

Volvo V-ACT and SCR technologies

The new generation of Volvo diesel engines feature Volvo Advanced Combustion Technology, V-ACT. This employs an advanced new fuel injection system, a new and more effective air management system and enhanced engine management. It incorporates selective catalytic reduction (SCR) technology.

SCR engines are optimized for efficient combustion, which provides the fuel efficiency and low particulate emission benefits. To combat the resultant NOx emissions, AdBlue is injected into the exhaust gas. Exhaust gas and AdBlue then enter a catalytic converter, which turns the NOx into harmless nitrogen gas and water vapour. The cleaning process of the catalyst is done automatically by the system during normal driving.

The AdBlue tank has a volume of 15 L and is equipped with a level sensor which notifies the driver when its time to fill up the tank. The filling of AdBlue is usually done together with the filling of diesel. The AdBlue tank is heated by engine coolant and the AdBlue hoses are heated by electricity to prevent freezing in cold climates. (Freezing point of AdBlue -11C). There is no increase in service intervals, no impact on uptime. SCR has been used across the Volvo Group since 2006.

Cummins new diesel engines for EU Stage IIIB / EPA Tier 4i

The new Cummins diesel engine platform combines cooled exhaust gas recirculation with an improved High Pressure Common Rail (HPCR) fuel system and particle filter. This enables cleaner and more efficient combustion that results in an up to five percent better fuel efficiency without compromising performance.

Powerful braking

The service brake system is of the wet disc brake type, featuring one set of fixed and one set of rotating oil-cooled discs that are linked with hydraulic pressure from the brake pedal upon activation. This provides extremely effective and smooth braking over an extended period of time without risk of overheating or fading.

Drive and steering axle

The steering system utilizes a well-proven, robust design with a double acting cylinder and a pendulum suspension. This provides high strength and durability. The robust design of the drive axle handles extreme stresses from quick manoeuvring and/or normal operations in tough working environments with heavy loads, high intensity operations and even towing tasks. The drive axle has a two-stage reduction to ensure minimum strain on the transmission system – differential and hub reduction.

*In this picture Volvo TAD761VE with SCR system and ZF transmission.

Keeping clean and cool to reduce risks of failure

The truck's improved cooling system keeps the engine room cooler, which prolongs the lifetime of engine, hydraulic and electrical components. In addition, you keep the radiator clean from potentially harmful dirt, dust or particles by adding an optional reversible cooling fan.

Advanced electronics and proven power train

More intelligence means more uptime. The new DCG90-180 incorporates an improved electronics system with reduced fault sources. Its modern distributed and redundant CAN-bus technology continuously controls the truck's condition while providing the driver with real-time data.

Electronics system

Kalmar's electronic system is a fast, intelligent and stable system that makes the truck more reliable and user-friendly. The improved electronics utilize far fewer connection points and cabling, which means fewer potential fault points

and improved operational reliability. A modern, distributed and redundant CAN-bus (Controller Area Network) monitors and controls the condition and performance of the engine, gearbox, valves and some 500 measuring points in the engine – 50 times every sEGOnD.

The CAN-bus also keeps driver well informed of the truck's status by sending real-time condition monitoring data to a 3.5" colour display that is placed at eye level in the cabin.

Saving maintenance time & effort

Fast, simple and more convenient daily inspections and regular servicing was prioritized and achieved in developing the new DCG90-180. An array of new built-in features saves maintenance time, effort and costs.

Daily inspections and regular servicing

Performing daily inspections and regular servicing takes just a few minutes. Here are some of the many built-in maintenance improvements in the DCG90-180:

- Easy to get to location of the electric cabinet
- All hydraulic oil filters can be reached from above at one location
- A special drain for shaft oil makes it possible to fill oil while standing

All daily inspection checkpoints are directly accessible at ground level from the side of the truck.

Electric cabinet is easily accessible.

Improved placement of hydraulic filters.

Wear and spare part savings

The DCG90-180's usage of well-proven assemblies, systems, units and components also means low part failure rates, thereby promoting savings in wear and spare parts. Furthermore, Cargotec manages an advanced and extensive distribution network. This offers you simple sourcing and rapid availability of high-quality, original parts. Our local, dedicated customer service teams provide Just-In-Time deliveries, quick response as well as the right level of support to your business. Cargotec stays close to you – wherever you are – to help keep your cargo on the move.

500 hours of driving

Well-proven assemblies, systems, units and components have been extensively used in the DCG90-180. This ensures long service intervals of 500 hours. This matches the top performance levels in the industry.

The Kalmar difference

Superior truck-and-driver productivity

- New EGO cabin is our most productive working environment – ever. It's loaded with improved ergonomic features to inspire driver productivity, efficiency and safety.
- New electric and hydraulic systems as well as modern lifting equipment help drivers boost productivity levels whilst reducing fuel consumption

- The improved electronic system is a fast, intelligent and stable system that ensures truck uptime and operational reliability. There are far fewer connection points and cables, thus significantly reducing potential fault sources.
- A distributed and redundant CAN-bus system continuously monitors the truck's condition. It sends real-time condition monitoring data to the driver via a 3.5" colour display in the cabin.

Cummins QSB6,7 engine.

Fuel efficiency.

Operational and maintenance savings

- Your choice of EU Stage IIIB / EPA Tier 4i compliant diesel engines from Volvo or Cummins. Both engines feature new advances that improve fuel efficiency.
- New load sensing pumps boost lifting productivity and lower fuel consumption.
- Dozens of new features save maintenance time, effort and costs.
- Long service intervals of 500 hours.

Parts, resale value and customization: more ways to save

- Well-proven assemblies, systems, units and components
- Cargotec's distribution network and local support teams ensure fast, professional service
- High quality of the Kalmar brand secures high resale value
- Customize your truck to ideally suit your needs: Cargotec offers full support.

Global presence, local service.

Global presence and local service bring
our products and solutions closer to our customer.

*Cargotec improves the efficiency of cargo flows on land and at sea – wherever cargo is on the move.
Cargotec's daughter brands Hiab, Kalmar and MacGregor are recognised leaders in cargo and load handling
solutions around the world. Cargotec's global network is positioned close to customers and offers extensive
services that ensure the continuous, reliable and sustainable performance of equipment.
